

Skype: Easy Collaborations with Audio and Videoconferencing

Ever wanted to connect your students with other students around the world? Not sure what the role of Audio/Video teleconferencing has in your classroom or school? There are many teachers learning to use Audio/Video teleconferencing in pedagogically appropriate ways. During this presentation we will explore Audio and Video teleconferencing to see its uses for curricular and professional development purposes. Skype will be the program that we will use to demonstrate these applications.

Presenter:

Alex Ragone

Collegiate School, New York City
